

## 6 Way Valves

Written by Administrator

---

**Cocktails and long drinks composed of several components can be easily programmed to the precise customer recipe. For the bar several dispensing options are available to satisfy preferred working environments.**

### Features

- with Cascade 3 Builder software cocktails and long drinks are programmed conveniently
- dispensing towers can be equipped with one or several multiple valves. Each valve can dispense 6 spirits or 5 soft-drinks with soda or 4 soft-drinks with soda and still water
- by combining i.e. 3 valves in one dispensing tower, 12 spirits and 5 soft-drinks are available
- all components of one cocktail are dispensed into the same glass
- 8 components can be dispensed at the same time or in a programmed sequence
- each product key controls 8 components and 5 links to articles of other Cascade 3 modules in the loop. These links generate credits to FlexiBar, CodeCap and coffee machine to dispense components for other mixed beverages
